Specification

Model		SPS/S-CV1
Sewing Speed		Max. 1500 spm (Stitch Length : 3mm or below)
Stitch Length		0.1~12.7mm
Needle Bar Stroke		41.2mm
Needle		DP × 17 , DP × 15
Transfer Range(X-Y)		300mm × 180mm
Presser Foot Stroke		Standard 4mm(0.7~7mm)
Height of Presser Foot		22mm
Hook		Full rotary large hook
Memory Device		3.5" floppy disk (2HD) storage : Max. 691 patterns / diskette
Safety Device	Emergency Stop Function	Emergency stop during sewing
	Max. Speed Limit	Speed can be controlled at the range from 180 to 2500 spm with the external controlling switch
Pattern Selection Function		Choose desired pattern numbers from 0 to 999
Thread Trimming		Rotary mes thread trimming
Memory Backup		Work points are stored in memory when sewing is stalled due to power outage
2nd Original Point Function		Set the needle position during sewing by using jog key
Main Motor		Upper-shaft drive motor 500W Servo motor
		X-Y motor Step motor
Voltage		Rated voltage ±10%, 50/60 Hz
Power Consumption		600VA
Used Air Pressure		5.5kgf/cm ² (0.49~0.54 MPa)

* Specifications and appearance are subject to change for the improvement of products without prior notice.

Automatic Cap Visor Quilting Machine

SPS/S-CV Series

SPS/S-CV Series

Automatic Cap Visor Quilting Machine
developed through the advanced
technology of SunStar

**Rotary large hook
Rotary thread trimmer**

The adoption of large hook makes frequent bobbin exchange unnecessary during sewing, thereby enhancing productivity. The Rotary Mes-type thread trimmer is simple in structure and easy to use.

Optimal X-Y Mechanism

The adoption of the gantry type X-Y mechanism guarantees easy maintenance and reliable X-Y feed.

Lower Thread Winding

The bobbin winder attached to the upper part of the machine can be used to wind the lower thread.

High Feed Plate Type by Visor

High Feed Plate Type		A
Sewing Scope		
	X	182mm ~ 202mm
	Y	136mm ~ 160mm

**Direct Drive System Provides
Excellent Responsiveness
and Comfortable Working
Environment**

- Direct Drive System, newly developed by SunStar, means the motor is attached to the machine head directly. As the system connects the AC Servo motor to the upper shaft using the coupling, the machine provides improved responsiveness and upgraded stopping accuracy so it is optimum for high quality sewing.
- Since the V-belt is removed, vibration and noise are reduced. So the machine offers comfortable working environment, high productivity and low electric power consumption.
- In addition, the durability of the machine is greatly improved since there is no radial load from the V-belt.
- Direct drive system makes the installation job much easier and offers safe working environment.

Patent

The optical film for detecting synchro signals and the connected motor control device

Increased safety

The machine operation and emergency switches are located at the same place, so that their prompt and convenient use is possible.

Y-Rail Guard

The Y-rail guard and the dust screen can protect the user from accidents and prevent damage to the Y-rail and the Y-timing belt.

Out line Size

B	C
170mm ~ 190mm	165mm ~ 180mm
120mm ~ 144mm	108mm ~ 130mm

Various Sizes of Cap Visor Handling

The simple adjustment of the clamp makes it possible to handle different sizes of cap visors, enhancing the usability of the machine.

Easy Lower Feed Plate Replacement

The feed plate can be replaced by adjusting the hand lever. Therefore, feed plate replacement-related work efficiency has been improved.

Automatic Creation of Cap Visor Design

Based on the one line created by the user, the remaining lines can be automatically created, making line creation very easy.

>> Operation Panel

Easy and Simple Operation

- It's very convenient since operator can check data input error and thread cut right away on the monitor.
- Even though you are a amateur, you can use the machine comfortably owing to the dialogue type Operation Panel.
- You can save data input time by using shortcut button for frequently using function.
- Since Operation Panel is movable, it's very comfortable for operator to make a design.

Wonderful Input & Output

- Input for line, arc, spline and circle is very simple.
- Many kinds of stitches like as zig-zag, offset, automatic backtack, double forward/backward, condensing and overlapping stitches can be done very easily.
- You can do jobs like transferring, copying, removing and symmetrizing by easy operation.
- You can change the sewing and jumping speed even though machine is working.
- You can select any kind of design and input data just by selecting function code.
